PLAYERGRADE

Grade your imports before you sign them.

League-adjusted, position-specific player grades for clubs that recruit abroad.

In pilot use at clubs in Slovakia and Poland.

THE QUESTION IT ANSWERS	A winger looks good in Albania, Slovakia or Thailand. Is he good enough for the Super League? PlayerGrade puts every candidate on one 0 to 100 scale, adjusted for his league and graded against his own position.
HOW IT WORKS	**Grade the role.** 9 position models (CB, FB, WB, DM, CM, AM, W, ST, GK), each with its own per-90 metrics and weights. **Adjust for the league.** League coefficients put performances on a comparable level. **Count age and minutes.** Age lift capped at +7.5%. Under 400 minutes no grade, under 900 minutes marked Low data. **One band.** STRONG 60+, DEVELOP 46+, DEPTH 32+, MONITOR 18+. People still make the call. **AI explains, it never computes.** The score comes from the model. The AI writes the scout report from those numbers.
FOR SUPER LEAGUE CLUBS	Up to 15 registered foreigners makes every transfer window a large investment. PlayerGrade works on data your club provides, such as your own match-data exports, and shows the full calculation behind every grade, so the technical director, the coach and the board look at the same number.
WHAT YOUR CLUB GETS	Player profiles with the calculation visible, side-by-side comparison, shortlists, a squad builder, your own scouting profiles and PDF reports for the coach and the board.
YOUR DATA	Each club is a separate tenant, enforced by the database and tested before every release. A data processing agreement is signed before onboarding.
THE HONEST LIMIT	Calibrated on European league data and strongest for imports from Central and Eastern Europe. A Malaysian Super League coefficient is built together with one or two development-partner clubs.
NEXT STEP	**Meet in Malaysia, 5 December 2026 to 1 February 2027. Book 30 minutes with the link in my email, or write to lukas@camponord.eu.**
